(57) A composition of matter capable of being formed into articles having substantial dimensional stability comprising

- a) destructurized starch, and
- b) at least one polymer selected from the group of copolymers containing vinyl alcohol units together with aliphatic chain units as are obtained by copolymerization of vinyl esters, preferably vinyl acetate, with unsaturated monomers containing no functional group with subsequent hydrolysis of the vinyl ester group.

The composition may contain further conventional additives as well as hydrophobic, substantially water-insoluble polymers.
